Technical Skills

Programming Languages

- Python
- Bash
- Rust
- SQL

Version Control

- GitHub
- Git
- Branching & Pull Request workflows

Environment

- Linux
- Windows

Software Development

- Data Structures & Algorithms
- Web fundamentals
- Test case design and execution
- Basic test planning and bug reporting

About Me

Software engineering professional with a strong foundation in web applications, APIs, and system behavior. Experienced in analyzing requirements, identifying issues, and ensuring application reliability through structured testing approaches. Familiar with test case design, debugging, and API validation using modern tools. Strong analytical and problem-solving skills with attention to detail, committed to improving software quality and user experience while collaborating effectively within development teams.

PROJECTS

Hire Us – Admin Web Portal

Web portal for HireMe Application

- Admin users needed an efficient way to perform administrative and management tasks.
- A React and Node.js–based admin portal designed to manage service requests
- Perform live demos to customers and nurture client relationships
- Managed the end-to-end development lifecycle, focusing on maintainability and
- operational clarity

Task Manager (CLI Application)

Personal project | Rust, SQLite, Docker

- Designed modular Rust codebase for scalability.
- Implemented a GitHub Actions CI/CD pipeline test and build the application.
- Containerized application with Docker for consistent environments across systems.

Vulnerable Web Application

Car-Wash Clone – Security Learning Application

- Intentionally-vulnerable full-stack web application using PHP, HTML, MySQL, and Apache LAMP stack as a university cybersecurity assignment.
- Demonstrated practical knowledge of OWASP Top 10 vulnerabilities including SQL Injection, XSS (stored/reflective), CSRF, broken access control, and plaintext password storage.

Cloud Environment

- AWS
- Azure

Database System

- MongoDB
- MSSQL

QA Tools

- Postman
- Chrome DevTools
- Selenium
- BrowserStack

Soft Skills

- Team collaboration
- Attention to detail
- Adaptability to new technologies
- Analytical thinking

Language

- English
- Sinhala

Education

BSc (Hons) in Software Engineering (Reading)
SLIIT City Uni

G. C. E Advnace Level
Technology stream (Pass)
Mahanama College
S3

G. C. E Ordinary Level
Mahanama College
B1 C6 S2

Certification

- AWS Certified Cloud Practitioner
- The Complete Python Programming Course (Udemy)
- API Penetration Testing – APISec University
- API Security Fundamentals – APISec University

Extra Curriculum activities

OLD Boys Association

Mahanama College, Colombo 03 | 2025 – Present

- Active member contributing to event coordination and organizational initiatives.

Photography Group

Young Zoologists' Association | 2025 – Present

- Engage in photography activities and contribute visual content.
